BRINGING HOME HEALTH THERAPISTS AND AGENCIES TOGETHER

What is TheraFinder?

TheraFinder is a revolutionary new service to the home health industry that will forever change the way home health therapy is staffed. TheraFinder instantly connects home health agencies or Therapy Staffing Companies to a network of home health therapists in a given area. You will have the ability to broadcast any patient referrals you need coverage for to the entire TheraFinder network of therapists.

Turn Key Therapy, PLLC has designed the TheraFinder network allowing home health therapists and your company to instantly partner and work together. Your company will post a new patient referral on the TheraFinder network and instantly have home health therapists offering their services. Gone are the days of your company wasting time and money trying to find therapists to take your hard-to-cover patients. Using TheraFinder, the therapists come to you! TheraFinder is the only solution you need for your therapy recruiting needs!
